

Q Series

The Next Generation of Freight Elevator Doors

Cam Power Unit

Everything about the new Courion "Q" Style Cam Power Unit has been designed to assure easy installation and a long, maintenance-free life.

Great Design. This streamlined and compact design features a belt driven progressive cam - no more crank levers or air checks.

Quiet. Belt driven for smooth and noiseless operation. The Courion Cam Power Unit provides a gentle start as the cam retires, and eases to a stop when the cam extends.

Durable. Oversized 16 oz. torque motor provides a long and trouble-free life. Standard motor has a 30-minute stall rating.

This is the smoothest, quietest, simplest cam power unit ever designed for elevator freight doors.

Call Courion today for more information about Courion's new Cam Power Unit.
